

*Hatzolah Ashdod has inaugurated the use of a new motorcycle ambulance which is to serve the 200,000 residents of Ashdod. The ambulance will be able to weave through heavy traffic, enabling it to arrive at the scene quickly and begin providing life saving, first aid treatment in the initial critical moments after a serious injury. The motorcycle is equipped with the most up-to-date equipment including a sophisticated defibrillator, which is used to resuscitate patients whose hearts suddenly stop beating, and will be operated by Reb Shlomo Dvir, a veteran volunteer paramedic with ambulance licensing.*
